

# NOTICE OF TREE REMOVAL

## PEACHAM CRESCENT SLOPE STABILIZATION PROJECT, CITY OF TORONTO

Toronto and Region Conservation Authority (TRCA) will be undertaking necessary tree and vegetation removals to prepare for remedial slope stabilization works behind Peacham Crescent, in the City of Toronto. The intent of these works is to provide long-term protection to private properties located at the top of slope identified to be at-risk from ongoing hazards of erosion and slope instability.

**TRCA staff will commence site preparation, including necessary tree removals, in October 2021 ahead of the scheduled construction works. This pre-construction work is anticipated to take three weeks to complete.**

Tree removal work will be occurring in Exbury Park, along the Giovanni Caboto multi-use trail, and within the ravine lands behind Peacham Crescent. Work will typically be occurring between Monday and Friday, 7:00 AM to 4:00 PM. During this time, residents of the surrounding area may notice some noise from the equipment being used. Some vehicular traffic for removal of felled trees will be travelling through Exbury Park and along the Giovanni Caboto Trail.

Slope stabilization works behind Peacham Crescent are tentatively scheduled to begin in November 2021, following receipt of all necessary permits and approvals. Final site restoration works will be undertaken during favourable weather conditions following completion of construction. A Notice of Construction will be delivered ahead of the start of TRCA's remedial works.

**Please be advised that temporary trail restrictions within the work area is anticipated. To protect your safety, we ask the public to exercise caution and stay clear of the work area and any equipment while the tree removal work is underway.**

**If you are interested in receiving more information about this project, or you are interested in being included on future updates, please contact the Project Manager by one of the methods below:**
