

# NOTICE OF CONSTRUCTION

## Ashbridges Bay Park Major Maintenance Project

**Start Date:** April 2021

**Completion Date:** September 2021\*

*\*Timeline is subject to change*

Toronto and Region Conservation Authority (TRCA), in partnership with the City of Toronto, is preparing to undertake the construction of a rip-rap revetment and nearshore aquatic reef along the southeast facing beach in Ashbridges Bay Park. The objective of the Work is to address public safety concerns regarding the use of the Martin Goodman Trail, and to protect the shoreline against the hazards of erosion caused by severe storm events and high lake levels. The Work will also provide enhancements to aquatic habitat with the addition of the nearshore reef.

Construction is scheduled to commence in April 2021, pending the receipt of necessary permits and approvals, and is anticipated to be completed by September 2021. The work and transportation of materials will primarily be completed by barge, with the exception of TRCA or City of Toronto approved work vehicles driving along the park path. The project is being funded in part by the City of Toronto Parks, Forestry and Recreation Division and by Infrastructure Canada's Disaster Mitigation Adaptation Fund as part of a City wide shoreline protection effort.

To ensure public safety, an area along the shoreline of Ashbridges Bay Park, including a portion of the trail will be closed during the work. The construction area and trail route closures are shown in red, and the surrounding trail that will remain open is shown in yellow. For your safety, please respect all posted construction signs and stay clear of the work areas and equipment. Your cooperation and patience with this undertaking is appreciated.
