

NOTICE OF STUDY COMMENCEMENT & PUBLIC INFORMATION CENTRE

WILKET CREEK CHANNEL WITHIN WILKET CREEK PARK REHABILITATION STUDY TO ADDRESS EROSION HAZARDS THREATENING INFRASTRUCTURE AND GEOMORPHIC SYSTEMS & HABITAT STUDY

Toronto and Region Conservation Authority (TRCA), on behalf of the City of Toronto, has initiated a study to assess the geomorphic systems and habitat of the Wilket Creek subwatershed in developing a long-term strategy to address ongoing hazards to municipal lands and infrastructure within Wilket Creek Park as a result of stream erosion.

The study is being completed as a **Schedule B Master Plan** of the **Municipal Class Environmental Assessment**. Consultation with the public and government agencies will occur during each phase of the project in the form of Notices and Public Information Centres.

If you are interested in finding out more information about the study and/or would like to be added to the project mailing list, please contact:

Patricia Newland, Project Manager
Toronto and Region Conservation Authority
1 Eastville Avenue, Toronto, ON M1M 2N5
Tel: (416)392-9690 Email: pnewland@trca.on.ca

It is noted that during initial field investigations, three (3) priority areas were identified within Wilket Creek Park as requiring urgent repairs where erosion has exposed the existing sanitary sewer. Emergency repairs are proposed to be carried out over the next several months at these priority areas, to ensure the protection of municipal infrastructure while the overall strategy is being developed.

A Public Information Centre (Open House) to present the objectives of the study and the proposed designs for the emergency works at the first two priority sites in Wilket Creek Park is scheduled for:

June 29, 2011
6:00 PM - 8:00 PM
Sunnybrook Park Pavilion
1132 Leslie Street, Toronto

Member of Conservation Ontario
