

Toronto and Region Conservation Authority (TRCA) and the City of Toronto will be holding a public meeting as a way to engage residents in the life of their city. Toronto thrives on your great ideas and actions. We invite you to get involved!

WILKET CREEK GEOMORPHIC SYSTEMS AND FISH HABITAT RESTORATION MASTER PLAN

Background

In 2011, the City of Toronto and TRCA initiated a Municipal Class Environmental Assessment (EA) Study to identify preferred methods for enhancing the overall stability and function of Wilket Creek. Like many urban watercourses, Wilket Creek has been impacted by human activities and uncontrolled storm sewer discharges. This has led to extensive erosion causing impacts to trails and subsurface infrastructure, failure of previously constructed erosion protection measures as well as the degradation of the quality of aquatic habitat and the Creek's riparian zone.

The Process

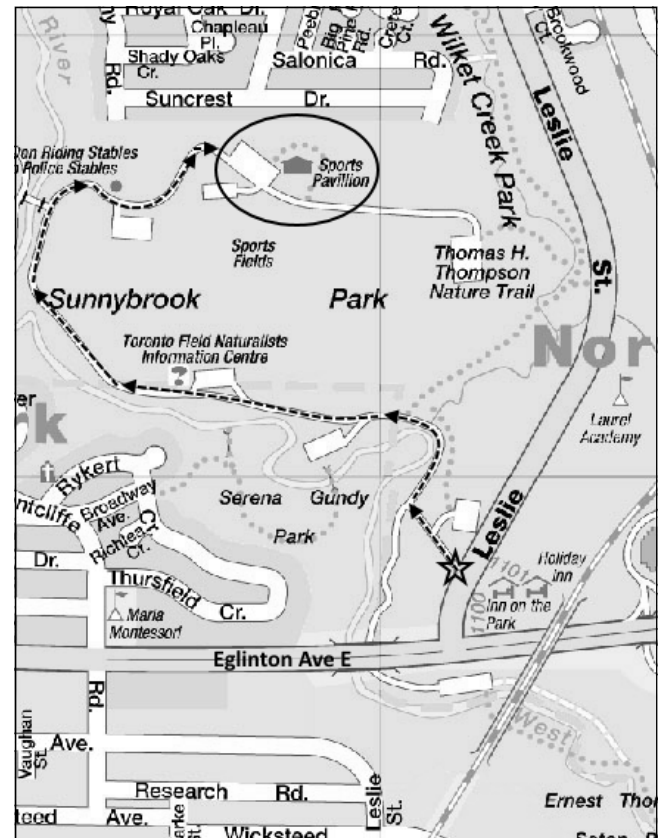

The study is following the Master Planning provisions of the Municipal Class EA process (amended in 2007). The study will define the problem, consider and evaluate alternative solutions, assess impacts of the proposed solutions, and identify measures to lessen any adverse impacts.

We Would Like to Hear From You

Public consultation is an important part of this study. If you have any questions or comments or would like to be placed on the study mailing list, please contact:

Patricia Newland, Project Manager II
Toronto and Region Conservation Authority
Tel: 416-392-9690
pnewland@trca.on.ca

Municipal Class Environmental Assessment Study Notice of Public Meeting

You are invited to attend a public meeting to find out more about the study, provide feedback on observed channel problems and solutions being considered, and the next steps in the process. You will have the opportunity to view displays, speak with and ask questions of project staff, and provide your input. Details are as follows:

Date: Weeknight of June 5th, 2014
Time: 7:00 pm until 9:00 pm
Location: Sunnybrook Park Sports Pavillion
1132 Leslie St, Toronto
