

NOTICE OF FILING

YELLOW CREEK NEAR HEATH STREET EAST EROSION CONTROL & SLOPE STABILIZATION

Toronto and Region Conservation Authority (TRCA) has prepared the Class Environmental Assessment (EA) Project Plan for the Yellow Creek Near Heath Street East Erosion Control and Slope Stabilization Project. The Project Plan has been prepared in accordance with Conservation Ontario's *Class Environmental Assessment for Remedial Flood and Erosion Control Projects* (amended 2013), the approved process for this type of undertaking.

As outlined in the Project Plan, the results of the evaluation of alternatives led to the identification of *Alternative 3: Channel Realignment, Soil Nailing* as the preferred alternative for channel and slope remediation works. The selected alternative meets all project objectives to provide long term, low maintenance protection to at-risk essential structures.

Interested persons are invited to review the Project Plan and provide written comments within thirty (30) calendar days by December 21, 2022. All comments and concerns should be sent directly to the Project Manager. The Project Plan is available for review electronically on the TRCA's project webpage or by contacting the TRCA Project Manager listed below. Hard copies of the Project Plan are also available upon request.

<https://trca.ca/conservation/erosion-risk-management/restore/heath/>

Written comments must be received by **December 21, 2022**.

Following the 30-day review period of this Project Plan and the successful resolution of any concerns received during, TRCA intends to finalize the detailed design of the preferred solution and obtain the necessary approvals to proceed with the implementation of the selected alternative.

In addition, a request may be made to the Ministry of the Environment, Conservation and Parks for an order requiring a higher level of study (i.e. requiring an individual/comprehensive EA approval before being able to proceed), or that conditions be imposed (e.g. require further studies), only on the grounds that the requested order may prevent, mitigate or remedy adverse impacts on constitutionally protected Aboriginal and treaty rights. Requests on other grounds will not be considered. Requests should include the requester contact information and full name for the Ministry.

Requests should specify what kind of order is being requested (request for additional conditions or a request for an individual/comprehensive environmental assessment), how an order may prevent, mitigate or remedy those potential adverse impacts, and any information in support of the statements in the request. This will ensure that the Ministry is able to efficiently begin reviewing the request.

The request should be sent in writing or by email to both recipients below:

Minister of the Environment, Conservation and Parks
Ministry of Environment, Conservation and Parks
777 Bay Street, 5th Floor
Toronto ON M7A 2J3
minister.mecp@ontario.ca

Director, Environmental Assessment Branch
Ministry of Environment, Conservation and Parks
135 St. Clair Ave. W, 1st Floor
Toronto ON, M4V 1P5
EABDirector@ontario.ca

All requests should also be sent to the TRCA Project Manager by mail or by e-mail.
