

Nashville Cold Creek Floodplain Wetland Proposed Deliverables

12184 Cold Creek Rd
(Humber River , York)

Emergent Zone Depths: 10 cm to 50 cm
Deep Pocket Depths: 2 m
Contoured Soil Mounds Max Height: 50 cm
 Contoured Soil Mounds are created from the excavated material from the wetland pockets. The material is placed and contoured within the site and graded to create undulated terrestrial topography and further microclimates.

Forest Area: 0.27 ha
Wetland Area: 3.1 ha
Invasive Management: 0.21ha
